Banasree, Dhaka, Bangladesh

SUMMARY

I am a **Frontend Developer** with 1 year of professional experience specializing in React, Next.js and TypeScript. Building scalable, and high-performance web applications with modern UI, reusable components, and maintainable frontend architecture. Experienced in complex problem-solving, state management implementation, API integration, and delivering responsive user experiences. Learning backend development and exploring full-stack architecture.

EXPERIENCE

Beup Agency at Betopia Group

Banasree, Rampura, Dhaka

Frontend Developer – React.js, Next.js App Router, TypeScript, Socket.io

Oct 2025 – Jul 2026

- **REST & State Management:** Integrated complex REST APIs across dynamic, data-driven pages and managed global application state, building interfaces that stay responsive under real-world data loads.
- **Component Architecture:** Architected and delivered 5+ pixel-perfect, responsive modules, converting Figma designs into reusable components using TypeScript and Tailwind CSS, reducing redundant code by 20%.
- **Real-time Communication:** Built real-time candidate-to-candidate messaging using React, Redux, and Socket.io, integrating live status, typing indicators, and Firebase (FCM) push notifications.

SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Redux & Redux Toolkit, Zustand, React Query, Vitest, Shadcn UI, Tailwind CSS and Bootstrap.

Backend: Node.js, Express.js, MongoDB, PostgreSQL, Prisma, JWT, Firebase Authentication, Stripe.

AI-Assisted Engineering: Familiar with Claude Code, ChatGPT, and Gemini, using them for prompt engineering, code generation, debugging, refactoring, and code optimization to accelerate frontend development.

Tooling: Git & GitHub and Vercel.

PROJECTS

Blood Donation System: *React.js, Express.js, MongoDB, Nodemailer, Firebase*

Live | GitHub

- Built a blood donation platform to solve the challenge of quickly finding and contacting available blood donors during emergencies, enabling recipients to directly connect with matching donors.
- Developed a hospital emergency request system that automatically identifies and notifies suitable donors, reducing the need for uncoordinated crowds and manual donor searches during critical situations.

Medicine Store: *React.js, Express.js, MongoDB, Context Api, React Query, Stripe*

Live | GitHub

- Built a multi-vendor online medicine marketplace connecting customers with multiple sellers to browse and purchase medicines and healthcare products.
- Implemented RBAC, JWT authentication, and Stripe payments for secure order management.

ACHIEVEMENTS

- Awarded "**Employee of the Month**" for consistently high delivery output and exceeding project timelines.
- Ranked **11th** in the DIU Programming Contest and solved **300+** problems on competitive programming platforms.

EDUCATION

Daffodil International University

Computer Science and Engineering

Dhaka, Bangladesh

Sept 2021- Aug 2025
